Riverdale was once home to Sherwin-Williams, one of the biggest paint manufacturers in the nation. This neighborhood is home to Altgeld Gardens, a public housing project that consists of row houses, which is a different architectural makeup from that of most public housing communities. Embedded within this housing complex is a community farm that unites all residents.

Who lives here?

Race and Ethnicity

- 94% Black
- 2% White
- 4% Hispanic/Latinx
- <1% Asian or Pacific Islander

Chicago: ↑6%
Social Determinants of Health

Social determinants of health are social, economic, and physical conditions in which people are born, live, and work that affect health and well-being. For example, where you live can limit access to healthy foods, this can in turn increase one’s risk for obesity and other chronic conditions related to diet.

### Economic Factors

**Median household income**

- Riverdale: $14,415
- Chicago: $53,006

**Population living in poverty**

- Riverdale: 66%
- Chicago: 19%

**Unemployment**

- Riverdale: 37%
- Chicago: 8%

### Physical Factors

- 27% of housing units are vacant
- 32% of adults report that they feel safe in their neighborhood “most or all of the time”
- 32% violent crime incidents per 100,000 population

- 42% of households spend 30% or more of their annual income on housing costs
- 3 in 4 children are living in poverty
- 59% of households are receiving food stamps
- 84% of households are at risk for food insecurity
Access to quality health care services is important for preventing and managing diseases and achieving health equity. High cost of care, inadequate insurance coverage, and lack of availability of quality services generally lead to barriers in clinical care.

Access to Care

- 13% of the population are uninsured\(^1\)
- 73% report having a consistent source of primary care provider\(^9\)
- 69% report that it is “usually” or “always” easy to get the care, tests or treatment they needed through their health plan\(^9\)

- 46% of pregnant women received early and adequate prenatal care\(^10\)

Health Behaviors\(^9\)

Health behaviors are individual actions we take to prevent illnesses or maintain good health such as exercising and eating a balanced diet. Health behavior is greatly influenced by the social and economic conditions in which people live. For example, it is difficult to walk in the neighborhood to get exercise when you do not feel safe.

- 50% report drinking soda or sweetened drinks everyday
- 47% report being a smoker
Health Outcomes

Health outcomes are the measures that define the health and wellbeing of the community. Health outcomes are a result of social determinants of health, access to clinical care, and health behaviors.
